DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to an object recognition method that switches between a plurality of databases, classified in class 382, subclass 181 (image analysis/pattern recognition).
 - II. Claims 4-9 and 11-25, drawn to an object recognition system that uses feature vectors and detects distance, classified in class 382, subclass 106 (image analysis/range or distance measuring).
 - III. Claim 10, drawn to a plurality of databases, classified in class 707, subclass 103R (Data processing/Object-oriented database structure).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Claim 24, the most comprehensive of the combination claims of Group II, does not require switching between a plurality of databases as required by claim 1, the broadest subcombination claim of Group I, nor does it require the particulars of the plurality of databases as described in claim 10, the broadest subcombination claim of Group III. The subcombination

of Group I has separate utility such as pattern recognition and Group II has separate utility such as data management using a plurality of databases.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Bruce H. Bernstein (Reg. No. 29,027) on June 24, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
